IRON MANAGEMENT SERVICES

Optimising Your Iron Fleet for Performance and Cost-Efficiency

Our mission is simple: to enhance safety, reduce costs and non-productive time (NPT), and maximise your return on investment (ROI). We achieve this while helping you minimise your carbon footprint - delivering a more sustainable and profitable future for your operations.

Intervention Rentals' Iron Management service transforms how your iron inventory is handled. Through a combination of recertification, refurbishment, storage, cross-rentals, and procurement, we provide full lifecycle management for your pressure control and flow iron assets - ensuring they are always safe, compliant, and ready to perform when you need them.

IRON MANAGEMENT

SERVICES

Asset Management

We provide secure, centralised storage solutions for all your equipment, while ensuring every asset is fully traceable and ready for deployment. Through real-time tracking and detailed reporting, we simplify logistics and reduce handling costs, giving you complete visibility and control over your equipment.

Recertification

Our recertification services ensure your equipment meets all industry pressure testing and safety standards. With a timely turnaround and accurate certification records, we help keep your operations compliant and minimise downtime, so your assets are always operational and audit-ready.

IRON MANAGEMENT SERVICES

Refurbishment

By repairing and reconditioning your existing equipment, we extend its operational life while maintaining compliance with the latest industry requirements. This cost-effective alternative to purchasing new assets helps you reduce expenditure and maximise the value of your current inventory.

Our Professionals

Every solution we provide is backed by our skilled and experienced team. With decades of combined expertise in pressure control and iron management, our professionals ensure every inspection, test, and repair meets the highest standards of safety and performance. Their commitment to precision and operational excellence gives you confidence that every asset is handled with care and prepared for peak reliability.
