## RENTAL PRODUCTS

### NXT 30:1 HYDRA-CLEAN

High-pressure, cart-mounted spray cleaner for offshore and industrial use. Operates with hot or cold water up to 93°C and supports multiple guns. Ideal for mud removal, deck washdowns, and ship hull cleaning. Delivers 3065 psi and 25.9 lpm. ATEX certified (II 2 G c T6). Supplied with hose and spray gun. Available for rental or purchase.

### MKIV MUD VACUUM UNIT

Portable vacuum for oil- and water-based muds. Powered by rig air with automatic suction/discharge and a 210L tank. Skid-mounted with forklift points for easy handling. ATEX, DNV 2.7-1 & EN 12079 certified. Includes anti-static hoses and gulper head. Rent or purchase.

### MKIII MUD VACUUM UNIT

Air-operated unit for offshore housekeeping and mud clean-up. Features a 210L tank, automatic operation, and robust skid with forklift points and 4-leg sling. Certified to ATEX, DNV 2.7-1 & EN 12079. Supplied with anti-static hoses and gulper head. Rental or purchase options available.

### HUSKY PUMP 3300

Heavy-duty 3" transfer pump for high-viscosity and abrasive fluids. Stall-free air valve, leak-free joints, and Geolast® components ensure reliable performance. Flow rate up to 1135 l/min; handles solids to 13mm. ATEX certified (II 2 GD c IIC T4). Supplied with anti-static hoses. Available to rent or buy.

### AUTHORISED UK AGENT FOR SOLIDS VAC

Solidsvac systems are air-operated vacuum pumps built for transferring solids, sludges, and high-viscosity materials in demanding environments. With no internal moving parts or electrical power requirements, they deliver exceptional durability and performance for oil & gas, mining, wastewater, and industrial applications.

Trusted worldwide for handling abrasive and heavy materials, Solidsvac units reduce downtime and manual handling risks. As the official authorised UK agent, we provide local expertise, fast deployment, and full support for rentals, sales, and servicing.

# **ADDITIONAL**

SERVICES LINES

A photograph of an orange shipping container with its doors open, revealing various pieces of industrial equipment and tools inside. The container is situated outdoors on a paved surface.

**OFFSHORE SERVICES**

A photograph of industrial measurement equipment, including a large pipe with a pressure gauge and a blue motor, set up on a tripod in a workshop environment.

**MEASUREMENTS**

A photograph showing a large pile of blue-painted metal rods or pipes, organized in rows on a concrete floor, likely in a warehouse or storage yard.

**IRON MANAGEMENT**

A photograph of several long, orange-painted metal pipes or flowlines stacked horizontally, with their ends capped with red protective covers.
